

## H.264+ high compression ratio

Improve image quality, save storage space, and transmit more efficiently

Storage space of H.264 and H.264+

H.264

H.264+

## Human framing and tracking

The camera frames detected human figure, and move with the human, tracking the position of the human in real time.

## 4 .0 Megapixels Full HD, farewell blur

2560×1440P video playback, capture more detail and the image is more clear

1080P

4MP

## Smoke alarm detection

The camera immediately pushes the alarm message to the mobile app

## Absence detection

In the monitoring area, there will be alert when personnel leave and return to post, and there are notifications pushed to mobile phone APP

## Smart dual frequency bands high-speed and stable

Supports dual-band Wi-Fi,  
automatic identification of  
2.4GHz and 5GHz

The network speed is faster,  
and the video is smoother

2.4GHz + 5GHz

## AI human detection real-time alert

When a suspicious moving object is detected, the camera will trigger alarm and pushes an alert message to the phone APP

A black and white photograph of a baby sleeping in a crib. The baby is lying on their back, wearing a striped long-sleeved shirt and holding a bottle. The crib is covered with a dark blanket. In the background, a teddy bear is visible on a shelf. The image is framed by a dark border, suggesting a night vision camera's field of view.

## **Infrared night vision, Outstanding night image**

850nm high efficiency infrared lights,  
dual filters automatically switch between day and night, render sharp images even in darkness
